419 S. Alvarado St.
Los Angeles
Oct-30-17.

Dear Mr Johnston

Your notes and field observations of a genus like Allium are worth much more than any. founded on Herbarium material & I shall keep this letter of yours on that account

Dr Jepson's treatment of some things is not as scientific as it might be, as I do not put absolute faith in his judgement. When the Fl. Am. Flora is published we shall have it properly done.

Your observations are too important to lose sight of and I wish you would give us an article on the Flora of Mt S Antonio, especially of the higher Zones

The Nat. Bulletin will be published in late Dec. and you might have it ready for that

Yours truly

Edward Lee
